

A Few Facts

Cartrophen Vet (pentosan polysulphate) represents a new mode of action for the treatment of osteoarthritis. In the past only non steroidal anti-inflammatory drugs (NSAIDS) have been available.

Cartrophen Vet

- ❖ has been sold in Canada for over ten years and is marketed internationally.
- ❖ is of **plant** origin.
- ❖ is being used off-label for the treatment of osteoarthritis and interstitial cystitis in cats and for the treatment of lameness in horses.
- ❖ **is not a NSAID.**
- ❖ is administered as a series of 4 subcutaneous injections one week apart followed by single injections as required.
- ❖ is called a Disease Modifying Osteoarthritis Drug (DMOAD).
- ❖ has remarkably few adverse reactions.
- ❖ is the treatment of choice of osteoarthritis in older dogs.
- ❖ has a website www.arthritis.au.com which has many informative scientific and useful facts.

Dr. Janis Apse and Mrs. Dawn Milway-Arthurs welcome your inquiries.
